AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

- 1. (Canceled)
- 2. (Currently Amended) The An intermetallic material as claimed in claim 4, consisting of the following composition, by weight percent (% by weight): 12% Al, 22% Cr, 36% Co, 0.2% Y, 0.2% Hf, 3% Fe, remainder Ni and inevitable impurities.
- 3. (Currently Amended) The An intermetallic material as claimed in claim 4, consisting of the following composition, by weight percent (% by weight): 10% AI, 22% Cr, 36% Co, 0.2% Y, 0.2% Hf, 2% Ta, 3% Fe, remainder Ni and inevitable impurities.
- 4. (Currently Amended) The A use of the intermetallic material as claimed in claim 1, comprising as a high-temperature coating in at least a portion of a thermal turbomachines turomachine with the intermetallic material.
- 5. (Currently Amended) The use of the intermetallic material as claimed in claim 1, comprising forming as a felt comprising the intermetallic material on components which are subject to friction in thermal turbomachines.

Attorney's Docket No. <u>1033275-000444</u>

Application No. <u>10/524,889</u>

6. (Currently Amended) The use of the intermetallic felt as claimed in

claim 5, characterized in that wherein the intermetallic felt is arranged disposed on a

rotor or stator.

7. (Currently Amended) The use of the intermetallic felt as claimed in

claim 5, characterized in that wherein the component is a turbine blade or vane, and

the tip of the turbine blade or vane is equipped provided with an intermetallic felt.

8. (Currently Amended) The use of the intermetallic felt as claimed in

claim 5, characterized in that wherein the component is a turbine blade or vane and

the platform of the turbine blade or vane is equipped provided with an the

intermetallic felt.

9. (Currently Amended) The use of the intermetallic felt as claimed in

claim 5, characterized in that wherein the component is a heat shield segment made

partially or completely from an the intermetallic felt.

10. (Currently Amended) The use of the intermetallic felt as claimed in

claim 5, characterized in that wherein the intermetallic felt is covered with a ceramic

material.

11. (Currently Amended) The use of the intermetallic felt as claimed in

claim 5, characterized in that wherein the felt is used on components which are

subject to vibration in thermal turbomachines.
